- Data Mining for Decision Making in Knowledge Economy
- Role of IT Infrastructure in Knowledge Economy
- Role of ICT in the Knowledge Economy
- Role of e- Learning in Knowledge Economy
- Role of Social Media in Knowledge Economy
- Role of Software Engineering Methodologies for Product Development in Knowledge Economy
- Security Challenges for Cloud Computing Infrastructures in Knowledge Economy

Managing Business in the Knowledge Economy

- Knowledge Economy in the twenty first century
- Innovative Management Practices for Knowledge Economy
- Talent Management in the Knowledge Economy
- Role of Marketing in the Knowledge Economy
- Role of ICT in the Knowledge Economy
- Cash to Cashless in the Knowledge Economy – Challenges and Opportunities
- GST and Digital Economy – Impact on Business, Trade and Commerce and Public Finance
- Role of Knowledge Economy in the Service Sector
- Financial Accounting Based Systems and Knowledge Economy
- Role of HRM in Knowledge Economy

The knowledge economy represents an intangible economic configuration whereby knowledge is valued as a key factor in production. Economic growth in leading world economies is increasingly based on knowledge, in addition to tangible assets such as capital and labor. Knowledge is notable in the twenty first century as an important resource, which grows as it is frequently used. Knowledge tends, therefore, to play an increasingly significant role in economic development.

, Maharashtra, India. Phone : 022 33914561.

NCMAT 2018

Further, increasing knowledge-intensity takes two forms: the rising education level of the workforce (living or subjective knowledge) and the growing scientific and technical knowledge materialized in new equipment and new products (embodied or objectified knowledge).

Access to global knowledge needs to be modified for generation of local knowledge which will empower local groups to solve local challenges and also make significant contributions to the wealth of global knowledge. The Conference will ponder over the questions like, Are knowledge networks leading to information asymmetry and increasing concentration of power? How can developing nations overcome the digital divide as well as the knowledge gap? How can one make technology to be all inclusive to create sustainable business models? Can the universities and academic institutions strengthen the ties with Information Technology firms to create globally networked knowledge communities?

The average life span of an US Corporation in 1920's was 67 years, by 2013; the life span had reduced to, 15 years. The business environment of the knowledge economy is aggressive, highly competitive, volatile, uncertain, complex and ambiguous (VUCA). Managing Business in the knowledge economy would center around creating, nurturing and sustaining learning in the organization. Learning would be the critical differentiator and the key business driver for the organization in the knowledge economy. We live in an era of rapid, almost dizzying, innovation in products and processes. These innovations have increased consumer welfare through the introduction of new goods and services, improvements in the quality and lower costs of existing products, and an increase in the amount of information about available products. Human Resources would not be doing the traditional role of "Managing People" but would be responsible for capabilities that people create and the network that needs to be nurtured for creating these capabilities. Marketing in the knowledge economy would focus around value creation, total customer value management and global value chain. Further, access to high-quality data, artificial intelligence (AI) programmes can ensure messages to and communications with customers hit the correct target time after time. The more an AI programme knows about a client's preferences and priorities, the better it can meet and even anticipate future needs

FOR WHOM

The conference will add immense value to all categories of delegates, viz.

- Academicians
- Research Scholars
- Policy Makers
- Corporate Practitioners
- Entrepreneurs
- Technology and Managements Students
